

Professional Experience

2026 - Today	Redis Senior Test Automation Engineer - Built a Playwright E2E automation framework for Redis Cloud Terraform provider, achieving 90% resource coverage and establishing a CI/CD pipeline. - Refactored authentication in the Redis Cloud API test framework, eliminating redundant token generation and reducing total API requests by 60%. - Authored custom Claude and Codex skills and trained the automation team on optimal agentic workflows and token-cost efficiency. - Migrated 40+ Playwright UI tests to API, reducing regression flakiness and accelerating feedback loop.
2020 - 2026	Vimeo Principal QA Automation Engineer - Built an AI-powered framework, validating perceptual similarity between editor and backend-rendered videos, eliminating manual regression testing. - Built a Python BDD automation framework, covering 100+ core scenarios across CI/Stage/Production, automating 70% of manual API regression tests. - Developed Unit, Integration, and API automation frameworks, authoring 800+ tests that increased code coverage by 20%-30% for backend services. - Developed a TypeScript Playwright GUI framework, leveraging the Page Object Model design pattern. - Built a data-driven video rendering tool from CSV inputs, saving 8 hours of manual testing effort weekly. - Optimized CI/CD quality gates via selective test execution, cutting feedback time from 10 to 1-4 minutes. - Containerized test automation dependencies via Docker for consistent execution across CI/CD pipelines. - Conducted QA technical interviews and onboarded team members on test automation best practices.
2017 - 2020	Yedioth Information Technology QA Automation & Performance - Built a Python REST API test automation framework for Ynet, YnetNews, and Calcalist backend services. - Implemented a Python GUI automation framework using Selenium, saving 9 hours of weekly regression testing for CMS and websites. - Executed and analyzed performance tests using JMeter, ensuring high-traffic site stability. - Designed and executed manual test plans for new features across internal and external web products.

Skills & Technical Tools

AI	Claude Code, Codex, Augment, Gemini, Agentic Skills and MCPs.
Cloud & Infra	AWS(EC2, S3, Route53, VPC, Transit Gateway), GCP, Terraform and Env0.
OS	Windows, Linux, MacOS, iOS and Android.
Programming	Python, TypeScript, JavaScript, HTML and CSS.
Automation	Pytest, Playwright, Selenium, Mocha, WebdriverIO, Gherkin and JMeter.
API & Network	Postman, Bruno, Charles, Wireshark, Fiddler and Browser DevTools.
CI/CD	Kubernetes, Docker, GitHub Actions and Jenkins.
Version Control	Git, GitHub and GitLab.
Monitoring	Splunk, Datadog, Google Log Explorer and Grafana.
QA Management	ReportPortal, Jira, Confluence, Qase and TestRail.
Databases	NoSQL, MS-SQL, MySQL, Oracle DB and Redis(Cloud & Enterprise).
Languages	Hebrew(Native) and English(Fluent).

Education

2021	Pluralsight JavaScript - Core Language online course
2018	Campus-IL Python - Basics & Advanced online course
2016	SV College Quality Assurance - Web & Mobile Fundamentals
